Dr. Beth Horner
Superintendent

April Becherer
Principal

To Whom It May Concern:

I am pleased to offer this letter of recommendation for Omni Energy Partners. Over the past three years, our district has had the privilege of working with them on a significant project to upgrade key spaces within our school, including the cafeteria, media center, science lab and the replacement of our outdated HVAC system with new equipment and a state-of-the-art building automated controls system.

Omni Energy Partners played a pivotal role in transforming these spaces to better meet the needs of our students and staff. Their team carefully assessed our district's needs and developed a comprehensive plan to modernize the cafeteria, media center and science lab, ensuring that the improvements not only enhanced the functionality of these areas but also improved the overall experience for students and staff. The remodeling work was completed on time and with a level of craftsmanship that exceeded our expectations.

In addition to the interior upgrades, Omni Energy Partners successfully replaced our aging HVAC system with new, high-efficient equipment and advanced building automated controls. This upgrade has significantly improved the comfort and climate control within our buildings while also reducing energy consumption. The new system provides greater efficiency and ease of maintenance, and the building controls allow for more effective management of energy usage across the district.

Throughout the entire project, Omni Energy Partners was proactive in managing the work, communicating progress, and ensuring that the project stayed on track. They worked seamlessly with our staff, and their attention to detail was evident in every phase of the project.

The improvements made have resulted in a more comfortable and energy-efficient environment for our students and staff, as well as long-term cost savings for the district. I have no hesitation in recommending Omni Energy Partners to any school district in need of quality performance contracting services or building renovations as a whole. Their expertise and dedication to delivering high-quality, sustainable solutions make them an invaluable partner.

Should you have any further questions, please do not hesitate to contact me at 618.233.1054 or bhorner@highmountschool.net.

Sincerely,

Dr. Beth A. Horner
Superintendent
